

SVALBARD

An expedition to the ends of the earth

Period: September 2022 | **Days:** 5 | **Budget:** CHF 2000

Description: A journey beyond the 78th parallel, amid ice, immense silence and unreal light, near the North Pole. The expedition to Svalbard was a plunge into an extreme and magnetic world, a remote land that stole my heart. I know that a piece of paradise is hidden up there, among the blue shadows of the ice and the bare coasts of a unique landscape.

Day 1	Longyearbyen	SV	Departure from Oslo and arrival in Longyearbyen
Day 2	Longyearbyen	SV	Visit to Coal Mine 3 (morning) and Quad tour (afternoon)
